

Technology Expectations/Netiquette Statement: This class requires access to a computer or smart device, and a stable internet connection. Live lectures will be held via Microsoft Teams, so please ensure that you are able to access your Teams account before the first scheduled lecture. (Microsoft Teams operates better when downloaded onto the computer versus being opened on your browser). I encourage you to turn on your cameras and utilize your microphones during lectures as an opportunity to create an engaging classroom through the online format. However, when not speaking, I ask that you please keep your microphone muted to avoid any unnecessary background noise. Please note that all lectures will be recorded and posted to Moodle after class.
